

Friday February 5th

Mastering The Maths

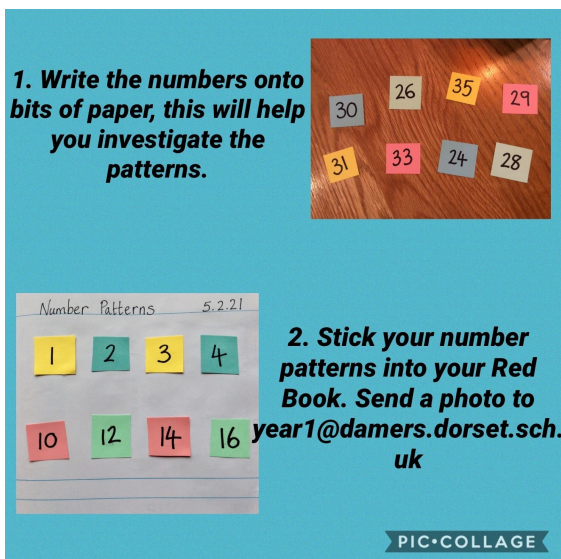

Have a go at the challenge below...

Maths Journal

Make two different number patterns with the numbers given.
Each pattern should have four numbers.
Use each number only once.

It might help to print out the stars or write the numbers on small pieces of paper, that way you can try out different ways of solving the problem. Stick your bits of paper into your journal to record the pattern. Your book should look like this. (I have used different numbers in my example)

There is also a maths challenge if you fancy it. And, if you would like to show how much you have learnt please do pages 19-22 in your work book (this is optional!)
